

Bilbao Bizkaia Ur Partzuergoa
Consortio de Aguas Bilbao Bizkaia

CONSULTA

Dear technical Team,

My name is Dhafer Kallel, project engineer for ASOS Process GmbH, Germany.

I saw your Tender offer “Sludge treatment services – Servicio de Valorización de Lodo Deshidratado Procedente de las Instalaciones de Depuración del Consorcio de Aguas Bilbao Bizkaia” on <https://ted.europa.eu/>.

We are a process technologies provider, located in Germany with manufacturing partners in Turkey. I would like to ask for further information about the published offer, if possible. The offer did not specify what is really required. Is it a sludge drying process or incineration process? What is the required technology? Is the offer only for Spanish speaking companies?

If I want to download all procurement documents, I must register our company in a third-party platform, which will take a lot of time based on their requirements. That is why I would like to ask for a little bit more details before making further decisions.

Thank you very much in advance for your insights.

Kind regards,

Dhafer Kallel

Project engineer

RESPUESTA

We have sludge drying process in the WWTPs. We are looking for sludge valorization, a sludge manager.

We are not going to build a factory to valorize the sludge.
